Glasgow-Blatchford Score (GBS)

Upper GI bleeding · risk of needing transfusion, endoscopic therapy or surgery · 0 to 23

U	**Urea (mmol/L)** 6.5-8 / 8-10 / 10-25 / ≥ 25	2/3/4/6
Hb	**Hemoglobin, men (g/dL)** 12-13 / 10-12 / < 10	1/3/6
Hb	**Hemoglobin, women (g/dL)** 10-12 / < 10	1/6
BP	**Systolic BP (mmHg)** 100-109 / 90-99 / < 90	1/2/3
HR	**Pulse ≥ 100/min**	1
M	**Melena**	1
S	**Syncope**	2
L	**Liver disease**	2
H	**Heart failure**	2

0	Higher score	Pre-endoscopic
Very low risk: possible outpatient care	Greater need for intervention	No endoscopy needed to calculate it

Predicts the need for intervention, not mortality · some protocols accept 0 to 1 as very low risk
