GRACE Score

Risk of death in acute coronary syndrome · a regression model, not a sum of points

1. Age
2. Heart rate
3. Systolic blood pressure
4. Creatinine
5. Killip class
6. Cardiac arrest at admission
7. ST-segment deviation
8. Elevated cardiac markers

> 140	Higher score	Calculator
High risk (European guidelines): early invasive strategy	Higher mortality	Official or validated tool, never by hand

Versions (original, 1.0, 2.0) do not give exactly the same figure · not needed in STEMI
