HAS-BLED Score

Major bleeding risk in anticoagulated atrial fibrillation · 0 to 9 points

H	**Hypertension** uncontrolled (SBP > 160)	1 pt
A	**Abnormal renal and/or liver function** 1 point each	1+1 pt
S	**Prior stroke**	1 pt
B	**Prior bleeding or predisposition**	1 pt
L	**Labile INR** (if on a vitamin K antagonist)	1 pt
E	**Elderly: age > 65 years**	1 pt
D	**Drugs and/or alcohol** (antiplatelets, NSAIDs) · 1 point each	1+1 pt

0 - 2
Not high risk: routine follow-up

≥ 3
High bleeding risk: caution and closer follow-up

A high HAS-BLED does NOT rule out anticoagulation: it means correcting modifiable factors
