Infections by Exposure Setting

The setting and the contact point to the germ almost without tests

ECH

Echinococcus granulosus

contact with dogs and their feces · liver cyst (hydatid disease)

BOR

Borrelia burgdorferi

tick bite in wooded areas · annular skin lesion (Lyme disease)

LEP

Leptospira interrogans

water or mud with rodent urine · fever, myalgia and jaundice (Weil syndrome)

NAE

Naegleria fowleri

swimming in warm fresh water · fulminant primary amebic meningoencephalitis

Dogs + liver cyst
Hydatid disease: anaphylaxis if punctured

Warm lake swim
+ meningitis: Naegleria

Rodent urine
Leptospirosis

Always underline the risk activity in the question: job, animals, travel and water
